

# ACCEPT

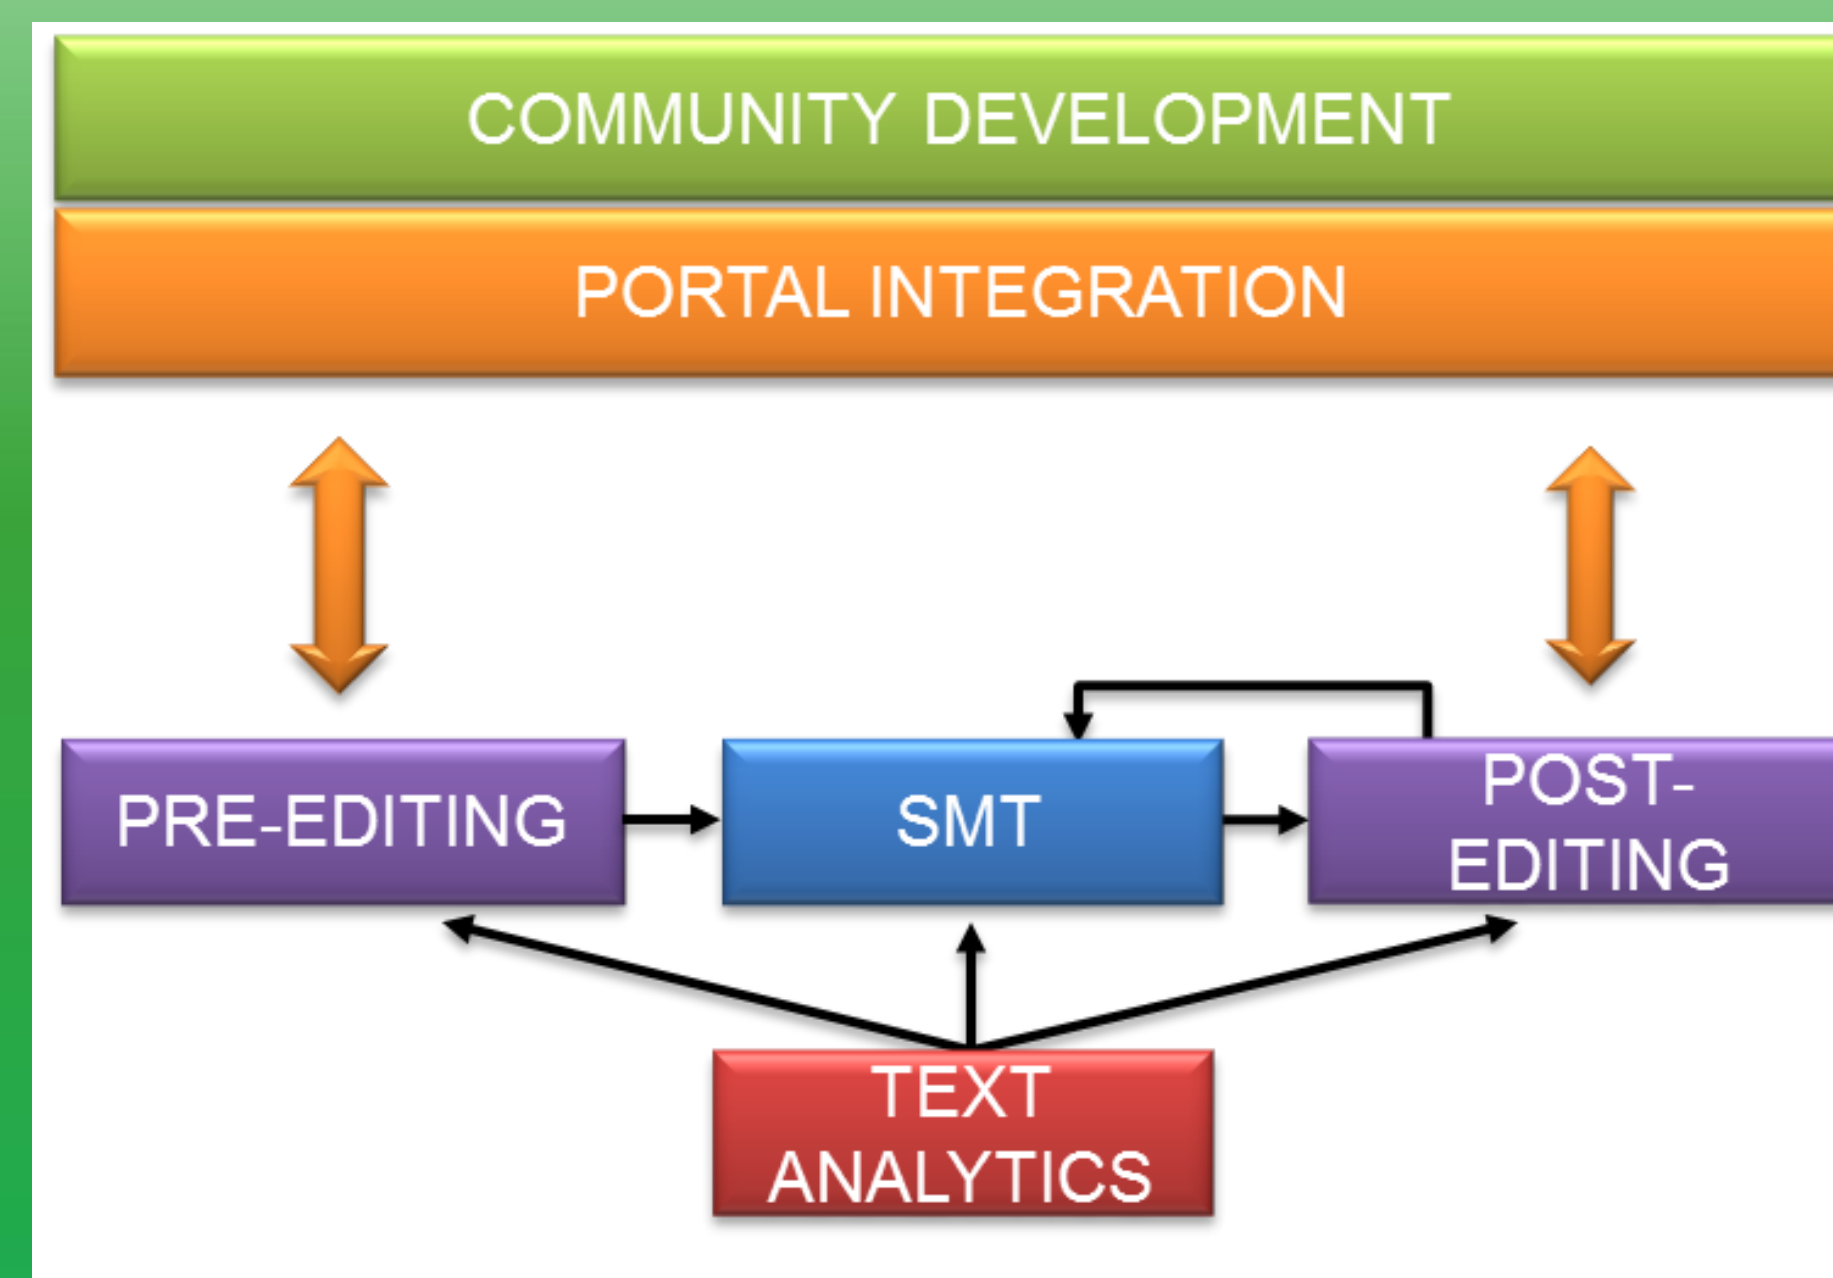

Help communities share knowledge more effectively across the language barrier

## PRE-EDITING

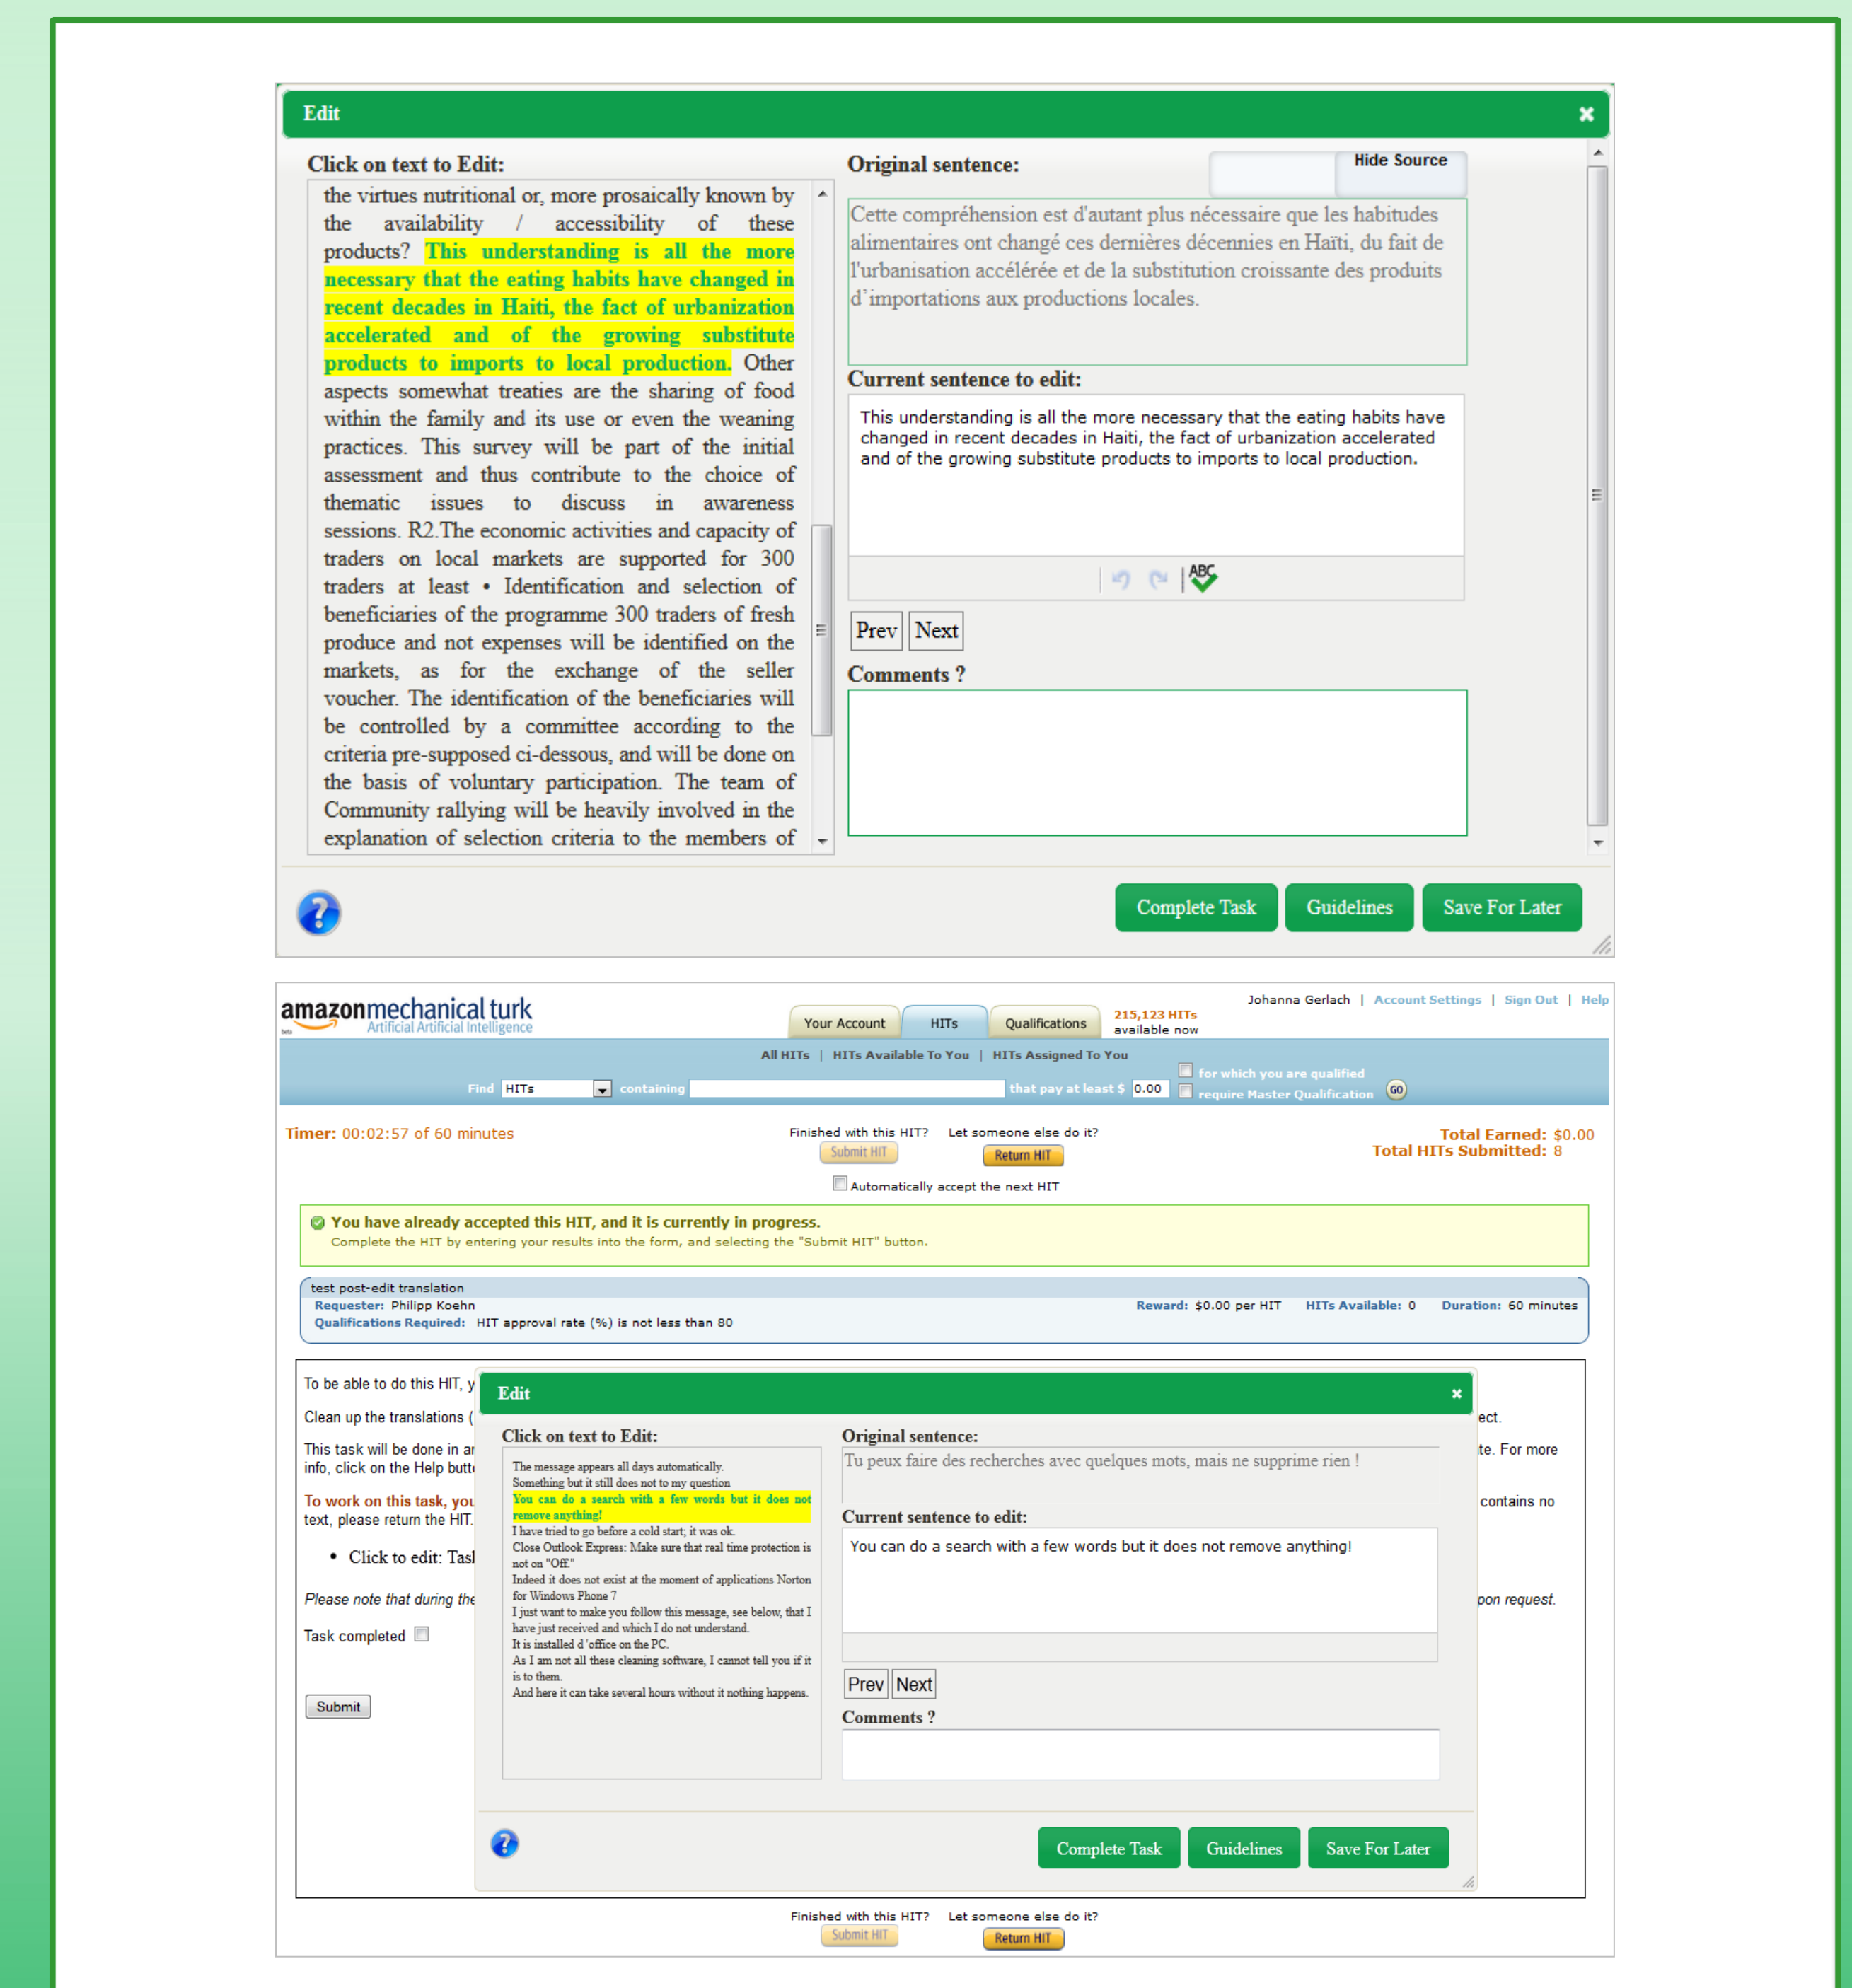

The top screenshot shows a forum post titled "New Message" with the subject "norton antivirus problem!!". The body text describes a problem with Norton antivirus on a new desktop system. The bottom screenshot shows a translation tool interface with the same text, highlighting a translation suggestion: "It only happens" for the phrase "it only happens when i have norton installed".

## PROJECT

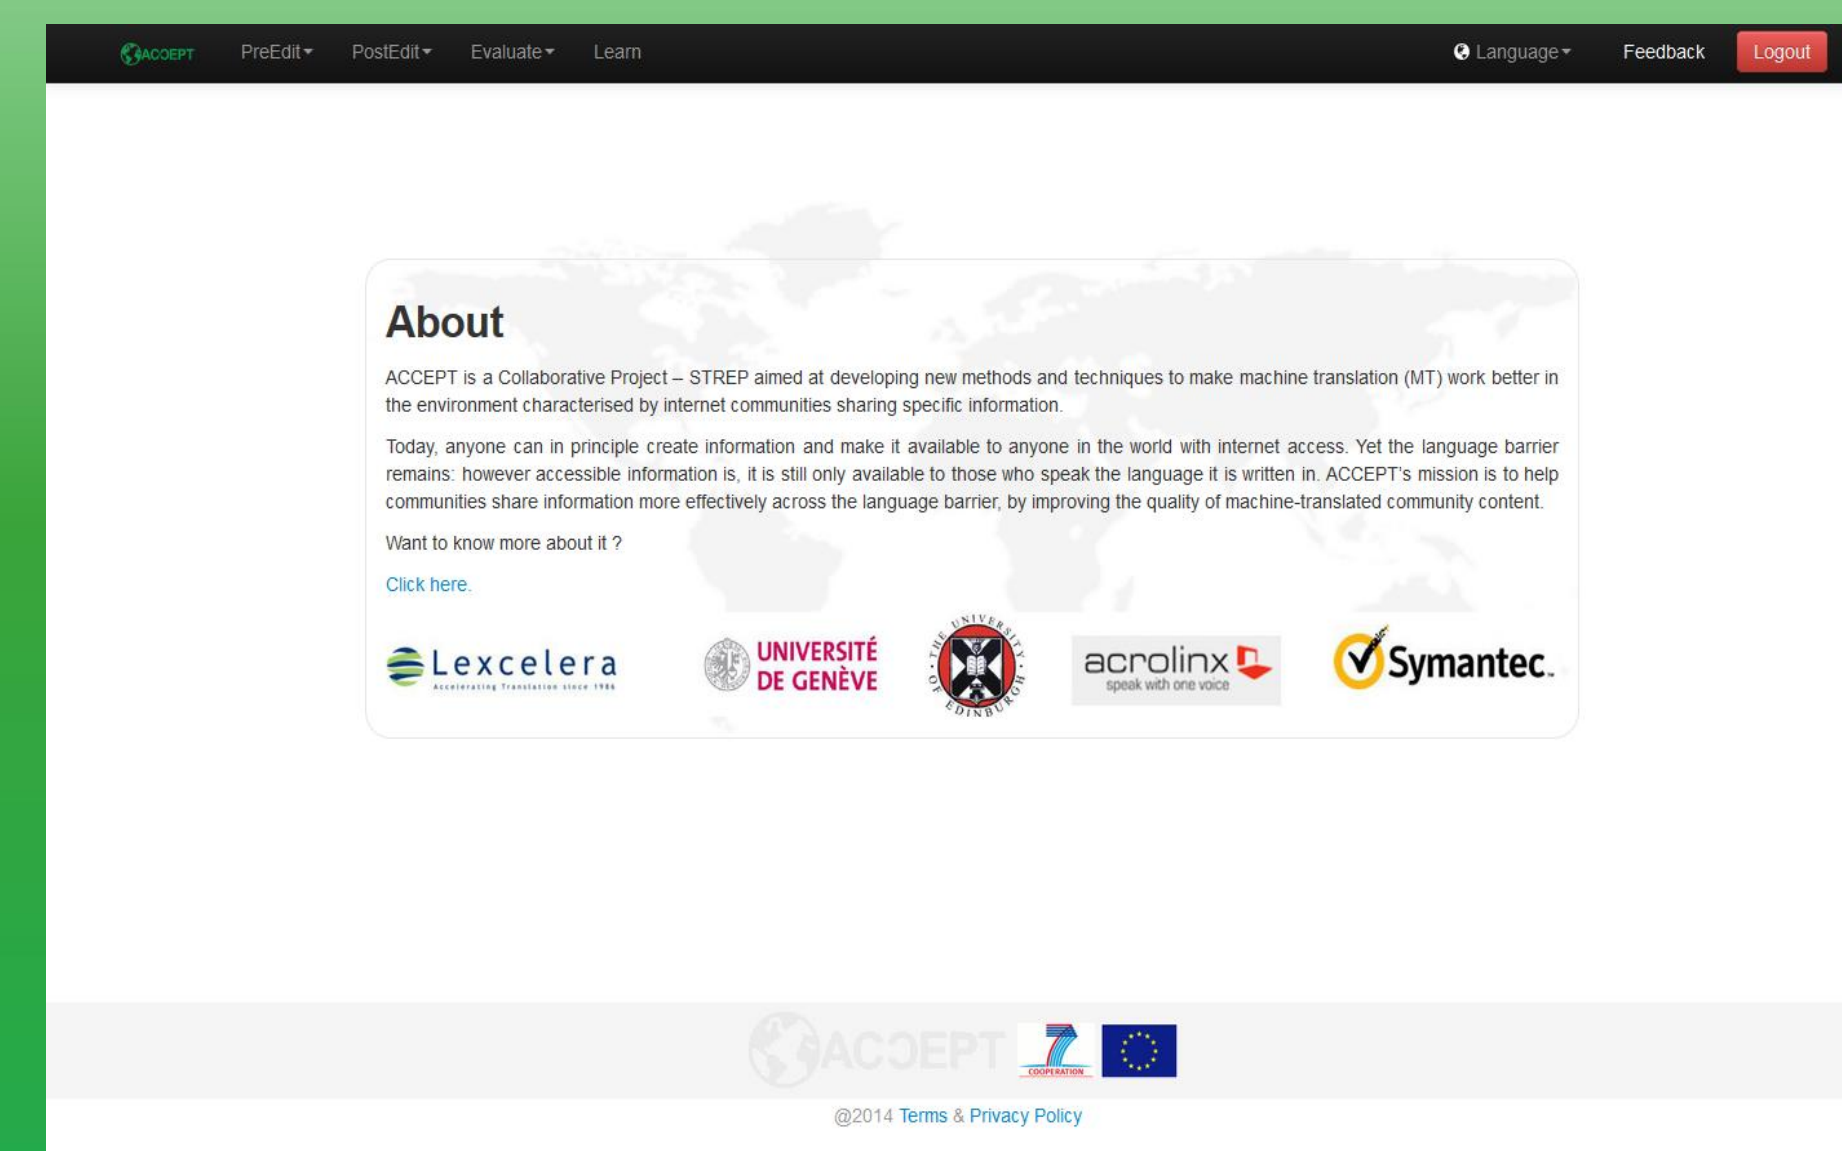

<http://www.accept-project.eu>

## POST-EDITING

The screenshot shows a post-editing interface with a text editor. The original sentence is in French, and the current sentence to edit is in English. The interface includes options for "Complete Task", "Guidelines", and "Save For Later".

## PORTAL

The screenshot shows the "About" page of the ACCEPT portal. It describes the project's goal: "ACCEPT is a Collaborative Project - STREP aimed at developing new methods and techniques to make machine translation (MT) work better in the environment characterized by internet communities sharing specific information." Logos for Lexcelera, Université de Genève, acrolinx, and Symantec are displayed at the bottom.
